## Education & Research Roles

### PhD, Biological Sciences

2021 – Present

George Washington University, Washington, DC

- Research Interests: Plant Ecophysiology, Climate Change, Hydraulics, Compression, Intelligence, Open Source
- Research Advisor: Dr. Keryn Gedan

### Research Associate

2019 - 2021

Pacific Northwest National Laboratory, Richland, WA

- Studied Tree Mortality In Response To Drought And Sea Level Rise
- Research Advisor: Dr. Nate McDowell

### BSc, Biological Sciences

2015 – 2019

University of Chicago, Chicago, IL

- Honors B.S. Thesis: Microbial Diversity and Function in the Phyllosphere
- Research Advisor: Dr. Joy Bergelson

## Software

### Rust

- myco: a declarative, acausal programming language for scientific models — e-graph compiler, NumPy/JAX backends, Python bindings. [\[Link\]](#)
- ozzydb: a purely functional approach to version control for scientific data; Rust server, CLI, web frontend, and Python client. [\[Link\]](#)
- sdi12: no\_std implementation of the SDI-12 protocol for embedded environmental sensors — the core runs anywhere with a GPIO, with firmware adapters for RP2040, STM32, and ESP32. [\[Link\]](#)
- riley web services: self-hosted suite powering [rileyleff.com](http://rileyleff.com) — riley\_auth (accounts and sign-in), riley\_cms (Git-as-database content management), riley\_leaderboards (versioned rankings with live updates), riley\_comments. [\[Link\]](#)
- Floco: a library to enforce user-defined constraints on arbitrarily-sized floats directly within Rust's type system; an early inspiration for myco. [\[Link\]](#)
- Dirgrab: CLI utility for injecting entire local projects into LLM context windows. [\[Link\]](#)
- licor: Type-safe parser for LI-COR 6800 data with Python and R bindings. [\[Link\]](#)

### Python

- quadrat: causal ecosystem simulator for benchmarking ecological reasoning in LLM agents, with Docker-sandboxed agent evaluation. Code available on request.
- rileyviewer: Browser-based plot viewer for matplotlib/seaborn, inspired by R's httpgd. [\[Link\]](#)

### R

- ezSperry: Wrapper package to call a stomatal optimization model from R. [\[Link\]](#)

### JavaScript / TypeScript

- Forest Royale: an educational 3D multiplayer game to communicate plant physiology concepts to students. [\[Link\]](#)
- annopurr: WebGPU image annotation tool for scientific measurements with TIFF support. [\[Link\]](#)
- rileaf2: PWA for measuring leaf area from images, designed for field use with the LI-COR 6800. [\[Link\]](#)

- RiLeaf.ijm: ImageJ macro automating leaf area quantification. [Link]

## Typst

- This CV! Follow the link for an example of how to generate a CV from structured data and formatter components. [Link]

## Hardware

- Sap flux logic board: open hardware for experimental heat-pulse sap flux sensors, built for a new method that solves for thermal parameters and probe positions conventional workflows assume; prototypes fabricated 2026. [Link]
- SDI-12 converter board: interface hardware (designed in atopile) connecting SDI-12 environmental sensors to any microcontroller with a GPIO. [Link]
